School Boiler Room Louvered Panels

Waller Glazing Services installed these school boiler room louvered panels and aluminium doors for a grammar school in Maidstone. The original Crittal frame was replaced with Smart aluminium windows and door set system. The Georgian wire glass was superceded with white infill panels and aluminium louvered panels were installed above. The aluminium door was double glazed with toughened and laminated safety glass. The new aluminium improve the look of the building as well as adding security.

New Aluminium Store Doors

In addition to the boiler room exterior, the school asked us to install three sets of aluminium doors to storerooms. We supplied and installed each new door in white to match with the existing windows and doors in the location. The new doors will add security and look fantastic.
